

**TITLE: WALLINGFORD ELECTRIC DIVISION
RENEWABLE ENERGY POLICY**

Effective Date: October 1, 2009

Adopted by Board: September 15, 2009

Revised by Board: _____

Certified By: _____

1. The purpose of the Wallingford Electric Division's (WED's) Renewable Energy Policy is to enable the WED's customers to access available funds intended to support the installation of renewable energy equipment and facilities.
2. Any qualified renewable energy project completed on or after October 1, 2009 is eligible to receive appropriate funding from sources described elsewhere in this Policy.
3. Any renewable energy funding available through this Policy shall be on a first come, first serve basis, subject to the availability of funds.
4. The WED's Renewable Energy Conservation Policy is administered through, and with the assistance of, the Connecticut Municipal Electric Energy Cooperative (CMEEC) and the Connecticut Clean Energy Fund (CCEF). Any Renewable Energy programs or incentives offered by the WED are intended to be identical to those offered by the CCEF.
5. For any project approved via this Policy and listed in Appendix A, the WED shall, through CMEEC and the CCEF, provide financial incentives as per the then in-place rates and stipulations of the CCEF.
6. Customers who accept an incentive payment for their project(s) as provided by this policy shall agree that any capacity-related credits or payments that the project(s) may be eligible to receive shall be fully assigned to the WED or its designee.
7. The WED reserves the right to consider, as eligible for an incentive payment, any renewable energy project not listed in Appendix A. Any such project must meet the eligibility requirements of the appropriate CCEF program then in effect.
8. The WED's renewable energy incentive programs are funded from non-rate-payer sources. These sources include, but may not be limited to:
 - CCEF monies designated for State-wide use to fund solar thermal and geothermal projects.

- WED's share of CMEEC's portion of CCEF monies designated for solar photovoltaic projects.
- WED's share of CMEEC's ongoing Regional Greenhouse Gas Initiative (RGGI) auction proceeds on hand at CCEF.
- WED's share of CMEEC's ongoing ISO-NE forward capacity market proceeds. (ISO-NE is the abbreviation used for the Independent System Operator of New England, the regional entity responsible for the operation of the electric bulk power system.)

WED customers interested in considering a renewable energy project at their home or business should first review the available and applicable offerings listed on the CCEF website at ctcleanenergy.com. CCEF can also be contacted by telephone at 860-563-0015. Customers who then wish to pursue further a renewable energy project should contact Michael Cassella, Director of Energy Efficiency Services for CMEEC, at 860-425-3218.

Appendix A

Below are listed the types of renewable energy programs in which WED customers may participate. Unless otherwise noted, all programs listed below are administered by and provided through the CCEF.

RESIDENTIAL CUSTOMERS

- Solar Photovoltaic (PV)
- Solar-Thermal
- Geothermal
- Green Energy Certificates (through WED)

COMMERCIAL AND INDUSTRIAL CUSTOMERS

- On-Site Distributed Generation
(Projects that generate electricity via Solar Photovoltaic, Wind, Fuel Cells, Biomass, Landfill Gas, and River Flows)
- Solar-Thermal
- Geothermal
- Green Energy Certificates (through WED)

October 1, 2009
